# Become a Pumpt Installer

Deliver more installation

Low expense on installation

Get paid faster

Hassle-free installation

## Get paid faster!

We just don't mean green for the environment, we also made it easy for you to get paid. We make sure we are always on time for your payment!

- We also offer incentives for installers who have high reviews!
- We pay £200 per home standard installation + materials and for a full day for larger, multiple jobs we pay around £300 + materials.
- We will make payments to you within 2wks of the jobs being completed.

## Be Ahead, we deliver more installations for you

We are the only company that offers insurance!

- We offer a lot of employment opportunities for our customers all throughout the United Kingdom and are looking for installers to help us install our goods.
- Because we offer insurance we take care of our customers this means more opportunities for installers.

## Lower your expense on installation

### Instantly cut costs, time, and difficulty

We are the manufacturer, our products are 100% rigorously tested before being shipped. Our products make installation quick and easy for installers.

- Built-in earth-neutral failure protection - no earth rod or isolation transformer required.
- 6mA DC leakage protection on our products so Only Type A install, no B RCD required.
- Automatic load balancing

## Hassle-Free installation!

Smart charging with dynamic load balancing enables you safely balance the energy usage between your electric car charging station and other appliances from home.

Transmits real-time data on your energy usage to the controller of the charger, ensuring the most efficient use of the power capacity available and saving you the cost of any grid upgrades.

- No earth rod required
- Provides PME fault detection
- Isolates live, neutral & earth
- Save on installation costs & time
